Hamilton's Roses

Old Favorites -- New Introductions

Heavy size 59c each; 3 for \$1.50

All our Roses are two-year, field-grown. Big, husky, well rooted bushes that bloomed in the nursery last fall, and with reasonable care, will bloom well until frost this year. We have carefully selected only those varieties which will thrive in your garden, and produce beautiful blooms of "hot-house" quality.

Quality considered, all these Roses are exceedingly low priced. Furthermore, they are backed by our complete service of selection, planting advice, growing helps and other year-round "good neighbor" services.

HYBRID TEA ROSES (HT) and HYBRID PERPETUALS (HP)

Hybrid Tea Roses produce lovely blooms just like you buy from your florist. They are called "Everblooming" and bloom intermittently from early summer until frost.

Hybrid Perpetual varieties produce extra large, fragrant blooms, in great profusion, in early summer. More hardy than Hybrid Tea Rose varieties.

E. G. Hill. H.T. Massive blooms of maroon, velvety on inside.
